

CSVHFS Conference La Crosse, WI 2022 Promotional Presentation

1) There are **2 files available** (exact same content) for the presentation:

a) A Microsoft Power Point presentation

Created in Power Point 365...the latest version of Power Point available. You are welcome to modify it as you wish for your presentation. But note that you will likely find it incompatible with older versions of MS Power Point (2016 and older?) and it is very likely that the formatting is incompatible with freeware Office-like suites (e.g., OpenOffice, LibreOffice, GoogleOffice, Keynote (Mac), etc). Because of these issues I have saved the presentation as a PDF, which can also easily be projected on a screen and stepped though just like a Power Point presentation. There are no animations, video, etc., so what you see in the PDF is exactly the same as the Power Point.

b) A PDF of the presentation (described above)

2) The presentation was created with using the standard 4:3 aspect ratio, which is ideal for projection on to a standard pull-down slide screen (still the most common projection system). It will not look right on a wide-screen TV or projector, which requires a 16:9 aspect ratio.

3) If you have suggestions for improvement, or find any errors, please let me know!

73,
Bruce, W9FZ
