#### DEDICATION

To the succeeding classes we respectfully dedicate this book. It is our fervent desire to assist in building and maintaining a peaceful world in which to live. We cannot rest until we fulfill this desire.... Then we will know that our efforts were not in vain.

## THE LORD IS MY PILOT

The Lord is my Pilot, I shall not fly alone. He upholdeth me through stormy or clear skies; He leadeth me down to safe landings. He steadies the controls. He guideth me through the pathways of the sky for His name's sake. Yea, though I encounter the storms and tempests of life I shall fear no evil, for Thou art with me. Thy love and Thy care, they sustain me. Thou preparest an airport before me in the homeland of eternity. Thou fillest my life with Thy blessings; my cup runneth over. Surely goodness and mercy shall fly with me through all the missions of my life, and I shall glide safely home to abide in the presence of my God forever.

—CHAPLAIN SUMNER W. JOHNSON  
Adapted from "Pilot's Psalm" by  
Chaplain E. H. Jones

## MEMO

"You've earned your bars and wings, gentlemen"....these are the words and thoughts of all who are even vaguely familiar with the pilot training program. You and I know it wasn't easy....no, as a matter of fact it was a long and tedious program, at times a trifle dangerous.

Who could forget the 'ups' and 'downs' of Cadet life, and the student officers trying to maintain their families. The cordial salute you are requested to make as the "under-dog", and later receive as the upperclassman. Certainly no pilot will forget the great day he soloed. Pride and fear, gentlemen, you experienced both of these "that day". You were proud, mister, and you had every right to be proud. The junior birdman that first bore wings that memorable day, has been adding bigger and healthier feathers to those wings and will continue to, until beckoned by the rocking chair, or sprout a pair of more permanent wings.

You are one of a select group and you have only God to thank for creating you with the mental stamina it takes to succeed in pilot and officer training program.

Through our course of training we grew to know our classmates as men of quality, respect, and ready to accept tasks never before known to them in previous walks of life. Ability and determination are among the prerequisites of a good officer and pilot. By successfully completing your training you have used these qualities in acquainting and adjusting yourselves to the numerous situations that you have been, and will be, confronted with.

The most wholesome individuals we were all confronted with were our friends and everybody's friends (paid advertisement) the Tac officers. They aren't exactly uncouth individuals since none of the weapons they carry are concealed. They usually greet you with open arms, clenched fists, baseball bats and cynical smiles. They are commonly referred to by the New Jersey and Kansas City 'hoods' as "wardens". Actually a thankless job to be sure.

It was rather inspiring to walk into the Officer and Cadet clubs when we first arrived at Reese from our respective basic training bases, and hear men from nine different bases relating their previous flying experiences. You could sense an air of curiosity as to what was in store. Our curiosity was not for long... those -Baker 25's were the answer. It was a big iron bird compared to the seemingly indispensable Tare-6. Remember the check lists--nothing short of a world Atlas. How about the first solo landing? It seemed as though you had 18 throttles and four landing gear handles: not to mention formation and those 360 overhead "pitchouts.

Other events that remain in our memories are; formations, hard landings... instruments... night flying... single engines... change of instructors... ace on base, gear down and locked, got the program knocked.. stag party.....and graduation!

As you are reading this print 52-How will be but a memory to its members and records to headquarters. With this book of the class, our almanac of "who's who" for tomorrow, and the last chock under the wheel, we will hear 52-H ramping out. Good luck and good flying.
